

DRAFT — FINISH CHECKS

Recommended/displayed Plan B · Rice bowl · \$15.00 per portion · 60 prepared
Planner A; Checker B. Three-hour festival. Sponsor targets: profit ≥\$150 and waste ≤10%. Classroom costing model.

Recipe and purchasing ledger

Batch factor: 3 (checked). One batch makes 20 portions.

Ingredient	Prepared quantity	Unit price	Base line cost	Prepared cost
Grain / base	6 (checked) kg	\$5.00/kg	10 (checked)	30 (checked)
Vegetables	9 (checked) kg	\$6.00/kg	18 (checked)	54 (checked)
Protein	6 (checked) kg	\$20.00/kg	40 (checked)	120 (checked)
Sauce	1.5 (checked) L	\$20.00/L	10 (checked)	30 (checked)
Packaging	60 (checked) units	\$0.60/units	12 (checked)	36 (checked)

Batch variable total: 90 (checked) USD. Prepared variable total: 270 (checked) USD.
Unit cost: 4.5 (checked) USD/portion. Fixed launch expense: 450 (checked) USD.
Fixed fees: stall 200 + hire 150 + setup 100 USD. Packaging is included for every prepared portion.

Price and contribution

Contribution: 10.5 (checked) USD/portion. Markup: 233.3 (checked)%.
Markup denominator: cost. Contribution interpretation: cover.

Cost classification

Grain / base: variable · Vegetables: variable · Protein: variable · Sauce: variable ·
Packaging: variable · Stall: fixed · Hire: fixed · Setup: fixed
This draft/report records submitted work; unchecked values are not certified.

Show how the numbers work

Sold-all assumption: x portions prepared and all x sold. Whole counts 0-120. Actual festival sales may be lower.

$R(x) = 15x$ (checked) · $C(x) = 450+4.5x$ (checked)

$P(x) = (21/2)x-450$ (checked)

Profit coefficient: 10.5 (checked) USD/portion; constant: -450 (checked) USD.

Portions	Revenue	Expense	R point entered	C point entered
0	0 (checked)	450 (checked)	(0, 0)	(0, 450)
60	900 (checked)	720 (checked)	(60, 900)	(60, 720)
100	1500 (checked)	900 (checked)	(100, 1500)	(100, 900)

Crossing ($\frac{300}{7}$ (checked), $\frac{4500}{7}$ (checked)); profit at 30: -135 (checked) USD. Only entered points shown; plotting checks pending.

Equality: $15x=450+4.5x$ (checked). Exact crossing: $\frac{300}{7}$ (checked).

First whole non-loss: 43 (checked); first positive profit: 43 (checked). Before: -9 (checked) USD; at: 1.5 (checked) USD.

Individual work and learning evidence

Learner A

Fee \$360, price \$14, variable cost \$5. Mode: digital. $P(x): 9x - 360$ (checked); break-even: 40 (checked); first positive profit: 41 (checked).

Submission: digital/recorded · review pending.

Learner B

Prepare 70, sell 56, price \$10, variable cost \$4, fee \$200. Mode: digital. Revenue: 560 (checked); expense: 480 (checked); profit: 80 (checked); waste: 14 (checked); sell-through: 80 (checked)%.

Submission: digital/recorded · review pending.

First attempts and final evidence

Checkpoint	First checked fields correct	Final current	Attempts / help
C01 Scale the recipe	12/12 field/context first checks	current	12 / 0
