

YOUR SEVEN-DAY CLIENT PROPOSAL

QA Cedar

Client delighted

Three travelers · Seven days · \$1,800 budget · Whole-day model domain 1–14.
Priorities: comfortable lodging and full activities. Planner A; Checker B.

Route and source

Total route: 900 km. Fuel efficiency: 12 km/L. Fuel price: \$1.60/L.
Source: Harbor City–Lakeview authored classroom route.

Selected itinerary and prices

Cost	Choice	Rate	Basis
Vehicle	Coastal wagon	\$40.00/group/day	7 days
Lodging	Lakeview lodge	\$110.00/group/night	6 nights
Food	Local cafés	\$15.00/person/day	3 people × 7 days
Activities	Adventure pass	\$30.00/group/day	7 days
One-off	Booking + luggage + supplies	\$40 + \$80 + \$80	Once
Fuel	900 km	\$1.60/L · 12 km/L	Once for route

Fuel calculation entered: 75 (Checked) L; fuel subtotal entered: 120 (Checked) USD. Food for the group/day: 45 (Checked) USD.
Hotel rule entered: 110(d-1). Nights entered: 6 (Checked).
Active quote: base hotel rate plus \$20/night, applied once. Client fit: 95/100 (design preference, not an academic grade).

Review status

Recommendation reasoning: pending

This proposal records submitted work. Unchecked or stale answers remain labeled; a printed draft is not a verified completion.

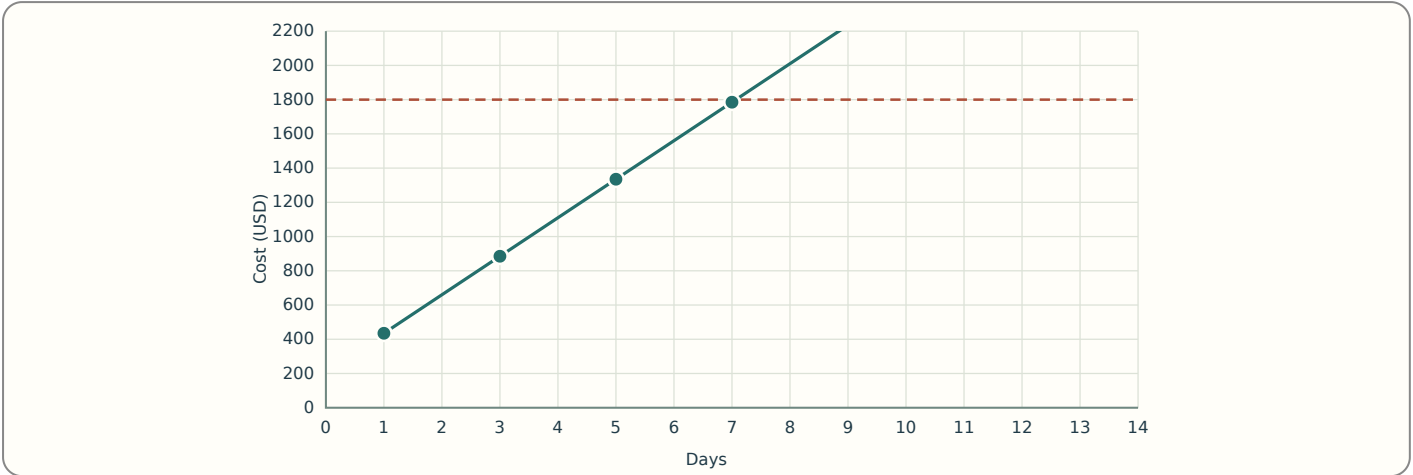

Show how the numbers work

Student rule: $C(d) = 225d+210$ · Checked

$m = 225$ (Checked) USD/day · $b = 210$ (Checked) USD.

Selected interpretations: m — Cost of one additional day (USD/day); b — One-off + fuel – one night of hotel (USD). Domain: Whole days from 1 through 14.

Days	1	3	5	7
Table cost (USD)	435 (Checked)	885 (Checked)	1335 (Checked)	1785 (Checked)
Plotted pair	(1, 435)	(3, 885)	(5, 1335)	(7, 1785)

Graph records entered points and budget height 1800 USD. Checked model line is shown only after current plotting checks. Day zero is outside the trip domain. One-day rise entered: 225 (Checked) USD/day.

Affordability

Inequality: $225d+210 \leq 1800$ · Checked

Continuous upper bound: $\frac{106}{15}$ · Checked; longest whole-day trip entered: 7 (Checked).

Cost at maximum entered: 1785 (Checked) USD. Next whole day entered: 2010 (Checked) USD.

A changed quote. A considered decision.

Before \$1770.00 Historical snapshot · m 220, b 230	Hotel event \$1890.00 Historical snapshot · m 240, b 210	Final active \$1785.00 Active revision 2
--	---	---

Historical amounts are the frozen scenario quantities, separate from current student responses.

Hotel-event changes entered: m 20 (Checked) USD/day; b -20 (Checked) USD; seven-day cost 120 (Checked) USD.

Recommendation

Decision: Recommend this plan. Evidence: reserve = 15 (Checked).

The new food plan leaves \$15 while keeping lodging and activities.

Seven-day total: 1785 (Checked) USD. Reserve: 15 (Checked) USD. Spending: 99.17 (Checked)%.

Reserve allocation / revision: No extra statement required for the 0-5% reserve band.

Client delighted

Lakeview lodge · Local cafés · Adventure pass. \$1785.00 total; \$15.00 left; 95/100 client fit.
